

Point-Of-Care Computing Cart

The Next Generation StyleView Carts improve viewing comfort and enhance productivity through an expansive range of effortless height adjustment. Twenty inches of sit-to-stand motion is combined with an additional five inches of independent monitor height adjustment and 25 degree screen tilt (on flat panel configurations), which benefits nurses and other users, including those who wear progressive lenses. A keyboard tray provides up to 12 degrees of negative tilt for proper typing position and reduced risk of repetitive stress injuries. The enclosed cable management compartment neatly routes and hides cables, making it easy to keep things sanitary. With an optional 55 Ah power system, StyleView Carts can easily accommodate future hardware upgrades.
