Whole Body Warming Therapy System

The Gelli-Roll™ whole body warming therapy system combines patient temperature management and tissue pressure reduction in one simple-to-use reusable product. A CSZ Plasti-Pad warming blanket is encapsulated within Akton® gel. This combination product when used with a Norm-O-Temp®, Blanketrol®, or Hemotherm® before, during or after surgery effectively provides patient warming and pressure reduction. The reusable Gelli-Roll is flexible, easy to clean and reduces set-up and break down time.
