

## Perioperative Automation Software

CareSuite 8.0 is the third major release of Picis Total Perioperative Automation's suite, a complete integration of surgical scheduling, supply chain management, revenue management and clinical workflow automation for surgeons, OR nurses, department managers and anesthesia providers. Picis Total Perioperative Automation centralizes documentation for all the perioperative care areas and facilitates the continuity of care. CareSuite 8.0 consists of more than 125 new features and helps hospitals further improve patient care, increase revenues and productivity, maximize resources, reduce costs, enhance supply chain management and support Joint Commission reporting requirements. Highlights of this version include integrated and comprehensive bar coding, enhanced tissue and implant tracking and integration of anesthesia billing information with external billing systems.
