

Aspiration/Delivery Needles

These versatile new aspiration and delivery style bone needles are available in eight gauge through 22 gauge. With large full palm handles, the needles provide the operator with the ability to use full pressure with out discomfort. These needles are offered with multiple point configurations on the stylet and/or the cannula. The needle design offers the user a choice for matched ground bevels for easy of entry through bone. Also available with the needle is the aspiration port system that incorporates multiple openings along the cannula shaft allowing for more material to be aspirated.
