## Carbon Fiber Back/Leg Extension

This 40-inch Carbon Fiber Back or Leg Extension provides completely metal free imaging of upper and/or lower body surgical procedures with a C-arm. The extension is light weight and easy to install on several Skytron surgical tables, including the Hercules 6700B, UltraSlide 3600B and EZ Slide 3501B. It is an ideal imaging enhancement tool for endovascular procedures, non-traction orthopedic procedures, pain management procedures and more.
