

Medication Tablet Crushers

EPS has added three tablet crushers to its line of patient care products. These medication crushers are ideal for any budget and dispensing need. All are designed to conveniently and effectively crush medication for patients who cannot or will not swallow tablets. The deluxe Medi-Crush units are manufactured from shatter-proof, lightweight plastic while the Heavy Duty Metal Tablet Crushers are constructed from die-cast stainless steel. The Heavy Duty Plastic Crushers (pictured) are available in 4 colors, all with durable stainless steel fittings. All EPS crushers use $\frac{3}{4}$ or one ounce crush cups to eliminate cross contamination.
