

## Wide-Screen Surgical Display

The 24-inch MDSC-2124 wide-screen surgical display features a wide-screen (16:10) LCD panel and full HD resolution (1920 x 1200). Thanks to this bright, high-resolution LCD panel, surgeons performing a surgical procedure using high-definition Endoscopy cameras are presented with stunning panoramic views and improved depth perception. Featuring broad input connectivity, the MDSC-2124 offers a versatile display solution for HD endoscopy cameras, room and boom cameras, ultrasound, PACS and patient information.
