## **Absorbent Counter Mats**

COUNTERZORB™ Ultra Absorbent Mats have been designed to protect counter tops and surfaces from liquid spills, chemicals and contaminants. Each mat has a unique six-ply construction with a polyethylene backing that is water and chemical resistant. With its multiple layers of fine fiber absorbent pockets, these mats possess greater liquid retention than course fiber towels. They function as a protective barrier between spills of liquid solutions and counter top surfaces. COUNTERZORB mats are available in conveniently shrink wrapped packages of 25 mats per pack. These mats are versatile enough for use in a variety of applications on the counter top surfaces of Central Sterilization Centers, Surgical Settings, Dental/Medical Offices, Clinical Labs and Outpatient areas.
