

Bariatric Pads & Positioners

Action® OR pads and positioners provide high-performance shear and pressure management for the obese patient. These reusable, durable products are made of Akton® polymer and designed to withstand the physical demands of the obese population. Action products evenly distribute weight and heat, offer maximum patient support and provide the consistent high-performance critical for longer term procedures. Free of latex, silicone and plasticizers the pads and positioners are also easy to clean and repair. These products are available in wide range of shapes and sizes.
