

Concentrated Cleaning Solutions

The new Prolystica[®] Ultra Concentrate Cleaning System is a complete solution for surgical instrument cleaning that provides superior protection of devices, staff and the environment. The family of formulas works together to protect valuable instruments. Built-in corrosion inhibitors protect instrument surfaces and prolong the life of the washer. At the same time, chelating and sequestering agents also protect instruments and enhance cleaning performance regardless of water quality or type. The Prolystica Ultra Concentrate products offer superior removal of blood, mucous and even the most challenging fatty soils associated with orthopedic procedures. They are available in ergonomic, easy-to-handle one- and 2.5-gallon packaging.
