Rust & Corrosion Remover

Surgistain[®] is a quick, safe and efficient revitalizing solution that removes rust, stains and corrosion from stainless steel surgical instruments. A 10 minute soak in Surgistain can restore any instrument to its original finish and loosen sticky box-locks and joints. Routine use of Surgistain will help maintain the life and efficiency of instruments and reduce expensive repair and replacement costs. It is also for use on all ophthalmic and microsurgical instruments.
