

Sterilization Containers

The V. Mueller® brand Genesis® sterilization container family includes all of the sizes required to sterilize and protect delicate instruments. The product line features mini-, quarter-, half-, mid- and full-size containers as well as extra-long and deep lid containers that are specially designed for oversized laparoscopic or bariatric instrument sets and trays. There are also Sterrad® system-compatible Genesis containers to help simplify and standardize sterilization packaging requirements with just one container system.
