

Surgical Gloves from Ansell Healthcare

At Ansell, we understand how much responsibility rests in your hands. That's why we work hard to develop innovative surgical gloves like our powder-free Encore® line. The Encore® family includes a glove for every need and provides the superior barrier protection of latex while decreasing risks that may be associated with powder. All of our Encore® family gloves provide: Safety & Protection, Superior Comfort & Fit, Tactile Sensitivity and Task Specific Designed Grip.

Encore® HydraSoft® 153

Smooth Advanced hydrating technology ideal for the prevention of dry, cracked hands

HydraSoft® 153 Technology...for hand health Ansell's moisturizing technology keeps hands hydrated to reduce dryness, roughness and cracked skin.

Unique features: • Anti-slip smooth finish

• Recommended for the majority of procedures

• Produced on ergonomically designed formers to enhance comfort and fit

• This glove is recommended to be used as an under glove because of the HydraSoft® 153 Technology incorporated in this product

Encore®

Textured Ideal for general surgery

Addresses Powder-Related Problems These gloves offer all the fit, tensile strength, protection and puncture and tear resistance needed for most surgical procedures.

Unique features: • Textured finish for reliable grip

• Recommended for the majority of procedures

• Produced on ergonomically designed formers to enhance comfort and fit

Encore® Acclaim®

Smooth - Ideal for general surgery

Smooth for Improved Sensitivity These gloves offer all the fit, tensile strength, protection, and puncture and tear resistance needed for most surgical procedures.

Unique features:

- Anti-slip smooth finish
- Recommended for the majority of procedures
- Produced on ergonomically designed formers to enhance comfort and fit

Encore® MicrOptic®

Ideal for delicate procedures

Superb Tactile Sensitivity...Exceptional Strength

Encore® MicrOptic® gloves offer exceptional dexterity and tactile sensitivity while providing outstanding strength and barrier protection. These gloves are ideal for delicate procedures in ophthalmic, as well as micro- and cardio-thoracic surgery.

Unique features:

- Anti-slip smooth finish
- Recommended for times when increased sensitivity to very low levels of tactile feedback is required

- Produced on ergonomically designed formers to enhance comfort and fit

Encore® Orthopaedic

Ideal for added protection

Extra protection without the Powder When we designed our Encore® Orthopaedic gloves, we made sure they provided the added strength and thickness for tear and puncture resistance that's

vital to withstanding the rigors of high-risk, trauma and reconstructive procedures.

Unique features: • Textured finish offers superior grip for handling instruments, sutures and situations where the application of high pressure is needed.

• 30% thicker than our standard powder-free glove

• Recommended when there is a need for extra protection and puncture resistance
