

High Definition Surgical Display

Barco's 24-inch MDSC-2124 builds on the proven technology of the 19-inch MDSC-1119 display and introduces a wide-screen (16:10) LCD panel featuring full HD resolution (1920 x 1200). The bright, high-resolution LCD panel provides surgeons using high-definition endoscopy cameras with stunning panoramic views and improved depth perception. Featuring broad input connectivity, the MDSC-2124 offers a versatile display solution for HD endoscopy cameras, room and boom cameras, ultrasound, PACS and patient information.
