

Reusable Safety Scalpel Handles

The BD Bard-Parker® Protected Blade System now offers size 4 and 4L reusable safety handles. The size 4 handles are designed to be the same safety design as the #3 safety handle and used with larger protected blades (#20 - #23) for additional procedures. Designed with the weight and feel that clinicians prefer, the instrument provides easy, one-handed activation of the protective safety shield. With quick assembly and disposal of the protected blade cartridge, this safety-engineered device also helps your facility comply with OSHA standards and federal regulations.
