

Surgical Glove

The Esteem[®] Micro Powder-Free Synthetic Surgical Glove is designed for procedures that require a more refined touch or as an outer glove when double gloving. It is made from a unique and proprietary polyisoprene formulation that is nearly identical to Natural Rubber Latex (NRL). It has the fit, feel and performance of NRL, without any of the protein allergens. The new glove is a thinner version of the Esteem SMT glove, which offers a smooth finish to the glove's surface. The Esteem Micro can be used with the Esteem Blue Surgical Glove with Neu-Thera[®], a synthetic glove designed for use as an under glove when double gloving.
