

Casters for Hospital Beds & Stretchers

Med-Bed (MB) Casters with eight-inch diameter wheels are designed to be used on hospital beds and stretchers. This casters feature sealed precision ball swivel raceway, precision ball bearings in wheels, crowned wheels for easy rolling and turning, bright chrome finish and full thread guards. Brake and mounting features include a very positive swivel lock that operates independently of the wheel brake, reducing wear and tendency to ratchet; a cam-hole orientation to customer specification that can be in the direction of travel or 90 degrees to direction of travel; factory-set mechanism, maintenance-free for the life of the caster; and a stem with 4 x M8 fixing holes to suit all bed layouts and reduce extra inventory needs. Optional anti-microbial wheels and four-inch and 5-inch wheel diameters models are also available.
