Drawer Handle Covers

These new Hinged Drawer Handle Covers provide complete protection for drawer labels against daily handling, tears, spills and grime. These innovative, clear covers resist yellowing while clearly displaying label information. Supplied with all newly-ordered Lista cabinets and Storage Wall® systems, the new hinged handle covers protect bar codes without impeding their easy reading by bar code scanners. The handle covers are perfectly complemented by free downloadable Lista Script labeling software, making Lista's drawer labeling system even more functional and powerful.
