III 5mm Clip Applier from Covidien

The ENDO CLIP[®] III 5mm clip applier features the innovative Clip Logic[®] technology, which is incorporated into the jaw mechanism and allows the capability of blunt dissection. Clip Logic[®] aligns the jaws prior to clip loading, allowing for reliable, consistent clip application. Additionally, a back-lit, liquid crystal display (LCD) Digital Clip Counter makes for easy reading in darkened laparoscopic OR environments. The Digital Clip Counter displays the precise number of clips remaining in the instrument at all times. Further, the instrument boasts longest clip of any conventional 5mm clip applier.
