Stirrups for Lithotomy Positioning

The Yellofin® Elite delivers optimal lithotomy positioning, for patients weighing up to 500 pounds. Yellofin stirrups allow for easy adjustment of abduction and lithotomy while maintaining the sterile field. The boot design reduces pressure under the popliteal fossa and the superficial peroneous nerve. The integral Lift-Assist mechanism allows easy movement of the leg during positioning. The Yellofin enables safe and easy positioning while providing enhanced surgical site access.
