

Surgical Gloves

Ansell Healthcare Products introduces Derma Prene[®] IsoTouch[™] powder-free, non-latex surgical gloves made from synthetic polyisoprene, which deliver the performance of natural rubber latex without the risks of natural rubber sensitization. Providing maximum barrier protection, comfort and excellent tactile sensitivity, Derma Prene IsoTouch brings the key features needed by surgeons and OR professionals into a single glove – including patent-pending SureFit[™] technology for extra coverage and protection on the forearm and to maintain the glove's position on the surgical gown.
