

## Hospital Cleaner Disinfectants

DISPATCH® Hospital Cleaner Disinfectant with bleach and Towels with bleach are effective against a broad range of microorganisms on hard, non-porous surfaces in one minute. DISPATCH can be used for cleaning and disinfecting hard surfaces such as plastic laminate, stainless steel, painted surfaces and glass and on a broad variety of medical equipment. This hypochlorite-based cleaner disinfectant is approved by the Environmental Protection Agency for a 30 second kill time for TB, as well as one minute efficacy on a broad range of other bacteria and viruses that are common causes of community and hospital-acquired infections.
