

Mobile Instrument Service & Repair, Inc.

Mobile Instrument is able to repair, refurbish, sharpen and perform preventive maintenance on all manufacturers' stainless steel and minimally invasive surgical instruments, both onsite and at its national repair center. The company also repairs sterilization containers, rigid scopes, flexible scopes, power equipment, video equipment and diamond knives. Turnaround time is same-day for all onsite repairs performed at the facility and one to four days for instruments repaired at the national repair center, depending on the severity of the problem encountered.
