

## Patient Transfer Boards

The Static-Free Patient Transfer Boards are lightweight, radiolucent and constructed with a protective coating that prevents patients from sticking to the mover during the transfer. The boards are available in white and in two sizes: 33 inches by 22 inches (item # 4755XL) and 72-inches by 22 inches (item #4777XL). David Scott also provides patient positioning products which include OR Table pads, BeanBag Positioners, Lithotomy Stirrups, 90 different Visco Gel products and a complete line of Blue Diamond® positioning aids.
