

Suction Tubes

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Suction Tubes

Pemco Suction Tubes are made from surgical stainless steel and then plated with surgical chrome to provide extra durability. These suction tubes are meticulously designed to provide superior balance and hand feel, and because they can be sterilized, they offer significant cost savings over disposable units. Pemco Suction Tubes can be purchased in adult or pediatric sizes. The adult tubes offer four interchangeable tip sizes, while the pediatric tubes offer three interchangeable tips.
