

Adjustable Laptop Cart for Ultrasound

The height adjustable Echo Laptop Cart is designed for Echocardiographic Technicians & Cardiac Sonographers. It allows users to carry more supplies and keep everything within reach during the ultrasound. This cart's proprietary lift technology offers an 18 inches of ergonomic height adjustment, rugged construction, effortless mobility and space saving accessibility. The kidney shaped work surface features a durable laminate surface, four protective probe rests and two cup holders for gel. The Echo Laptop Cart is for patient, emergency and operating rooms, labs, radiology, nurses' stations or wherever patient data or images need to be accessed.
