

Negative Pressure Wound Therapy Systems

Smith & Nephew has introduced a fresh perspective on negative pressure wound therapy (NPWT). Its range of easy-to-use NPWT systems, including EZCARE and V1STA, utilize the Chariker-Jeter wound dressing technique and lower negative pressure levels to give proven efficacy, greater cost-effectiveness and improved patient comfort. Their complete portfolio of proven solutions across the continuum of wound care, with exceptional clinical and service support, will help medical staff maximize clinical and economic outcomes.
