

Narrow Steam Sterilizers

The Tuttnauer 4472/5596 steam sterilizers, featuring 16-inch by 16-inch and 20-inch by 20-inch chamber sizes, are now available in a space-saving designs capable of fitting into the smallest of footprints. These FDA approved sterilizers are manufactured primarily for use in the operating room and ambulatory surgery centers. All Tuttnauer autoclaves are constructed from 316L stainless steel and offer a user-friendly control system. Reliable, non-proprietary components minimize downtime and reduce the costs of repair and maintenance. A wide range of upgrades are available, including flexible door designs and advanced cycle options. Tuttnauer also offers larger sterilizers for central sterile supply applications.
