

Suture Storage Module

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Suture Storage Module

The Starsys Suture Storage Module may be used in mobile or stationary enclosed Starsys units. The suture module, with three back to back shelves, fully extends from the Starsys cabinet, providing easy access for stocking or retrieval. When not in use, the module is secured behind a door to protect the contents from contamination from the surrounding environment. The Starsys modular design can accommodate multiple modules or a mix of modules and shelves and/or drawers.
