

Cord Reels for Medical Applications

Reelcraft Industries offers a line of stainless steel cord reels that are designed for medical applications where electrical power cords are required in sterile environments such as hospitals and surgery centers. The new LS5000 cord reel incorporates 304L grade stainless steel and a medical-grade cord assembly. Compact and easy to install, the LS5000 reel includes a 15-foot distinct grey SJTO-jacketed cord with medical grade endings, pigtail cord, multi-positional guide arm and cord stop. The company's complete line of medical-grade stainless steel cord reels range from very compact to ultra heavy duty.
