

Customizable Medical Carts

Blue Bell's Bio-Medical has launch a new website that includes its Design-A-Cart's online custom configurator. The site (www.BlueBellCarts.com) includes product information on Blue Bell carts and accessories for the medical industry. The new website coincides with the release of a complete line of pre-configured workstations, new accessories, and four new paint colors (kiwi, citrus, garnet and rose). The Design-A-Cart custom configurator puts design capabilities in the hands of the users. They can design workstations 24/7, including size, color, options and all accessories. A 3D image is built in real time as selections are made. Users can save their designs to a personal online folder for later referral or to request a quotation.
