

Post-Biopsy Cold Therapy Pack

Developed by a breast cancer survivor, ColdSPOT[®] is a moldable gel pack that now stays cold up for to 45 minutes, reducing bleeding, bruising, pain, and inflammation. ColdSPOT's patented self adhesive side tabs ensure consistent, targeted cold therapy over the biopsy site. Moldable gel is comfortable wear and fits discreetly in the bra. In a patient preferred feminine floral design, ColdSPOT provides the best combination of wearable comfort and effective cold therapy
