

Ergonomic Foot Switch

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Ergonomic Foot Switch

The Linemaster Junior foot switch is designed with an ergonomic low profile cast aluminum cover built for ease of use and long life. The Junior is designed to eliminate lower leg stress and pain after many hours of usage and can be easily be operated while standing or sitting. Special options include a water proof interior switch rated to IP68 standards, extra wide 12 or 24 inch versions, private labeling, custom paint finishes, and cordsets built to the customer's specifications.
