

Portable Bariatric Stand-On Scale

The ultra-light Model 5127 portable bariatric stand-on scale is lightweight, compact and stores easily under a desk or bed. User friendly, the scale features an enlarged, low-profile platform for easy access. It automatically turns on and zeros when you step on the carrying handle and then returns to zero ready to weigh the next patient. It boasts a weight capacity of 1000 pounds (445 kg) and the digital LED display is easily read in any light or environment. The cordless Model 5127 is powered by six disposable "C" batteries for an estimated 10,000 weighings.
