

## Rigid Sterilization Containers

Miltex offers a line of rigid sterilization containers and accessories that are designed to provide a more efficient organization and utilization of surgical instruments for the Hospital Operating Room and Central Supply, as well as in the Ambulatory Surgery Center. The Miltex containers are manufactured from an anodized aluminum alloy that prevents corrosion, provides thermal conductivity for fast drying and is lighter than other metals making the container easier to transport. They are available in One-Half, Three-Quarter and Full sizes and are offered with three depth options of four inches, five and a third inches and 6 inches. Other available accessories include Baskets and easy to use cost saving disposables, including Tamper Evident Locks and Indicators Cards.
