## Top Slide Surgical Table

Skytron's EZ Slide 3501B Top Slide Surgical Table provides 21-inch top slide with the precision positioning of an imaging table, significantly reducing patient set-up times, the need to reverse patients and the use of time consuming special positioning devices. EZ Slide 3501B provides excellent imaging flexibility and an impressively versatile range of full body imaging and articulation functions for general purpose and specialty surgical procedures, including powerful 700-pound lift and 600-pound articulation capacity. A durable, back-lit pendant control for low lighting environments is simply the easiest to use from any location around the table's perimeter.
