

Ceiling-Mounted Equipment Boom

The MODUTEC ceiling service unit is part of a highly configurable product line that can be targeted to meet specific surgical needs, with the option of four different arm systems in variable lengths and combined with varying modules. Its compact design conserves floor space, and allows for future enhancements. MODUTEC offers an unobstructed surface area, integrated accessory tracks and a range of shelves, rails and accessories to consolidate space. The rounded finish simplifies cleaning and LEDinside™ lighting effectively illuminates the workstation. Designed for efficiency, MODUTEC provides easily moveable beams, different brake options for maximum stability, modular accessory positioning and complete integration of multimedia cables all the way to the ceiling.
