

## Endoscope Exchange Program

The E-class® endoscope exchange, one of KARL STORZ's Protection 1® repair programs, helps customers control endoscope repair costs while maintaining long-term quality. Under this program, a customer's damaged rigid endoscope is exchanged for a newly manufactured replacement that is certified to meet the same specifications and demanding optical performance standards as new endoscopes, at a price comparable to a typical repair cost. Replacement endoscopes are usually shipped to customers within 24 hours to help minimize potential downtime. In addition, the E-class® endoscope exchange program provides automatic technology upgrades at no additional cost.
