

Fluid Waste Solidifier & Sanitizer

Premicide® solidifies and sanitizes liquid medical waste in a closed delivery system, saving facilities money by converting biohazardous waste into regular waste and eliminating potential exposure to harmful pathogens. This liquid waste solidifier meets most state requirements for converting liquid medical waste into chemically treated solid waste suitable for white-bag disposal, and is available in uni-dose and multi-dose sizes. Premicide also helps facilities comply with Department of Transportation regulations for the proper transport of liquid medical waste.
