

Office Hysteroscopy Cart

The Office Hysteroscopy Cart provides Gynecologists a cost effective option for performing office-based procedures. The office cart package contains all the capital components necessary for performing hysteroscopy procedures for diagnostics, office sterilizations and global endometrial ablations (GEA). Included is the SlimLine™ Hysteroscope featuring a small outer diameter, which is designed for patient comfort with minimal trauma. Its high flow rates provide optimal clear visualization for diagnosis and treatment. The Hysteroscope utilizes the Invisio® MegaPixel Digital Camera. This all-digital camera with CMOS sensor imaging technology delivers advanced image clarity and accurate color reproduction.
