

Continuous Nerve Block Kits

The Arrow® StimuCath® Continuous Nerve Block Kits offers improved infection protection for the patient and improved sharps safety protection for the clinician. The new kits include Tinted Chloraprep® Hi-Lite Orange®, which instantly highlights the prepped area with a rapid-acting, persistent and broad-spectrum antiseptic. Clinician safety is improved through the addition of SafetyGlide® Injection Needles, SharpsAway® II Locking Disposal Cup and StatLock® Catheter Stabilization Device. All of these infection protection and safety improvements are available in five new Arrow StimuCath kits in 19 Ga. or 20 Ga. catheter sizes and packaged in lower-profile trays that reduce storage space.
