Stainless Steel Case Carts

SSCI offers a selection of stainless steel carts for mobilizing supplies and equipment, or an enclosed cart for emergencies or surgical procedures. The high-quality carts are designed to be practical, functional and long-lasting. This line of carts includes Stainless Steel Case Carts with doors that open 270 degrees for loading and unloading, latch in open position and lift off their hinges. External handles extend the full width of the cart for easier maneuvering and the full wrap-around vinyl bumper extends beyond the Cart sides and handle to protect doorways and walls.
