

## Accelerator-Free, Nitrile Examination Gloves

Tronex Healthcare Industries, a brand leader in quality health and safety solutions has launched a Tronex brand Nitrile, Powder Free Examination Glove. Accelerator is a chemical normally used to process gloves that have the possibility of causing type IV allergic reactions. The Tronex "New Age" Nitrile Powder Free Examination Gloves is Accelerator-Free. These gloves conform to the shape of the wearer's hand, while also providing textured fingertips and advanced barrier protection. The company's proprietary low modulus formulation created these Nitrile gloves to be more flexible and cost efficient, yet exceed all safety standards.
