

## **In-Service Training Program for Preoperative Skin Prep**

PDI has introduced a new In-service Training Program designed to educate healthcare personnel including infection preventionists, physicians, and nurses on the use of Chlorascrub®. Chlorascrub® is a preoperative and preinjection skin preparation with a unique 3.15% w/v Chlorhexidine Gluconate (CHG) / 70% v/v Isopropyl Alcohol (IPA) formulation. The Chlorascrub® In-service Training Program is a comprehensive program that facilitates product usage training and continuing education. Some of the key educational tools in the program include a User Guide DVD, a Clinical Compendium, a PowerPoint presentation, Instructional Wall Charts and other useful tools. With its clinically proven efficacy, Chlorascrub® can help prevent bloodstream infections and thereby reduce associated cost. Chlorascrub® is available in three one-step delivery systems and is approved by the FDA for inclusion in kits.
