

Suture Storage Racks

These Suture Storage Racks keep sutures separated, organized, visible and easily accessible during surgery. Each box is stored securely and separately from the next box with a patented divider design. Three different size suture racks are available with dividers that fit a total of 18, 24, or 36 full size Ethicon suture boxes. The suture racks also fit half size suture boxes as well as wide suture boxes. Units can be mounted on a wall or stored on a cart for easy individual refill. The racks are designed specifically for Ethicon suture boxes but custom racks are also an option.
