

Anesthesia Product Catalog

AliMed, inc. recently released its new 2009 Anesthesia Catalog. AliMed has always featured anesthesia specific products in their annual Operating Room Sourcebook and various publications throughout the year, but this is AliMed's only Anesthesia-specific catalog in over two years. The 72-page catalog includes everything an anesthesiologist or nurse anesthetists uses everyday, from straps and positioners to A-line or airway management tools. AliMed's familiar, easy-to-find format makes this catalog an ideal one-stop shopping option for any Anesthesia department.
