Foot Switch for Medical Equipment

The Linemaster Aquiline foot switch is designed with a high impact polymeric plastic or stylish zinc cast cover and is built for ease of use and long life. These switches are available in Single, Twin, Triple and Quadruple models and are designed to meet nearly all medical and light duty applications. The Aquiline is a great solution for operating equipment such as harmonic scalpels, lasers, ultrasound systems, medical tables, lifts and cameras. Options include a waterproof interior switch rated to IP68, USB, wireless, special labeling or paint finish and special cordsets to the customer's specifications.
