

Hernia Repair & Prevention System

The CT CloseSure System XL[®] provides the same full-thickness port-site wound closure that you expect from the CT CloseSure[®] System, but in a larger size designed for obese and bariatric patients. Its fast, easy-to-learn technique ensures full-thickness closure, preventing port site herniation. The CT CloseSure System XL includes elongated 10/12mm and 15mm Pilot[®] Guides and lengthened Carter Thomason Suture Passer. The CT Closure System XL can also be used for ligating abdominal wall bleeders and tacking hernia mesh.
