

Integrated HD Vision System

HD visualization is now within the reach of Ambulatory Surgery Centers and Physicians offices. PC Medical provides complete visualization solutions with the addition of its LightRay[®] HD 300 Xenon Light source and LightRay[®] HD telescopes. The company's EndoHub[®] is a HD vision system that integrates still image and video capture directly into the camera architecture and incorporates a touchscreen camera system that can be integrated directly into a network for image/video archiving, storage and integration into EMR systems. Complete systems start as low as \$400/month.
