

## Oral Care Kit

The Kimberly-Clark KIMVENT 24-Hour Oral Care Kit is a systematic and flexible oral care system developed to assist caregivers in meeting the CDC recommendations for an oral hygiene program for patients at risk for ventilator-associated pneumonia (VAP). For ventilator-dependent patients, it is well-documented that proper oral care is critical in the prevention of VAP. Designed by nurses for nurses to address the challenges associated with oral care products, the KIMVENT 24-Hour Oral Care Kit has a convenient and portable design as well as ergonomic and user-friendly tools. The kit can be kept at the patient's bedside to promote use.
